

Applications for Pre-16 Education Places

Elective Home Education.

Bridge Training Ltd is able to engage in the education of children aged 14 (Year 10) and above. However, there are stipulations set out by the local authority and national regulators.

Parents who have chosen to Electively Home Educate (EHE) their children can access Bridge Training's services once the child has been Electively Home Educated for the required period (6 months for Year 10 and 3 months for Year 11). After achieving this period, applications can be made via our website, following the same process as the post-16 cohort.

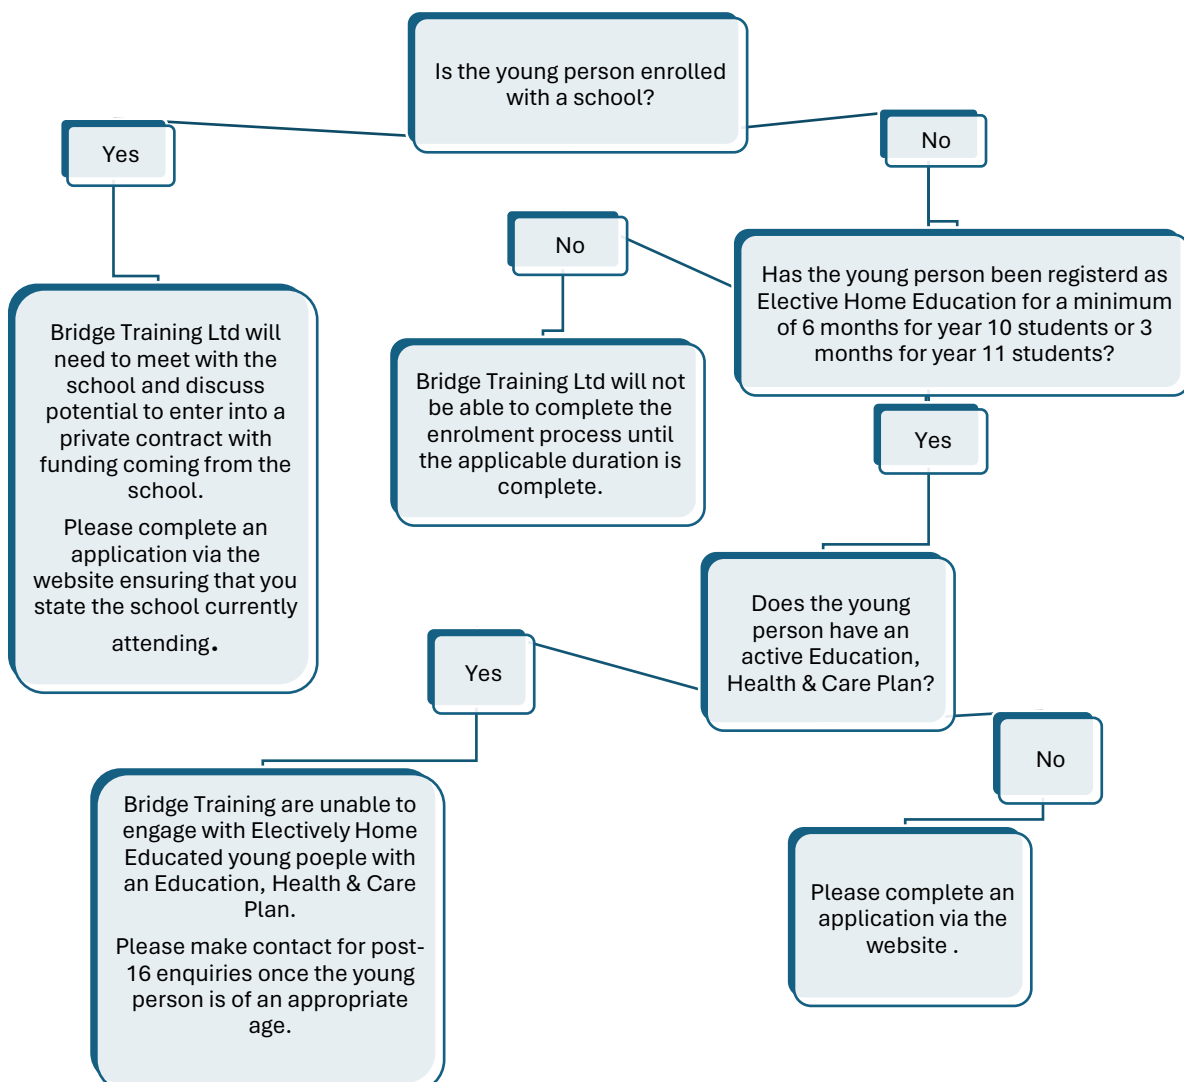

Bridge Training Ltd is aware of the impact that missing education can have on the personal, social, and mental health of young people. Therefore, any application made will consider our ability to meet the needs of the young person and actively reintegrate them into education. (please see policy [5.10-Student-Selection-Recruitment-Transition.pdf \(bridgetrainingltd.co.uk\)](#) on the policy page on the website).

For those considering this process, Elective Home Education is the right of parents. However, this is not something that should be taken lightly, and Bridge Training Ltd always recommends that this process is undertaken in collaboration with the named school and local authority.

Please see the links below for further information.

Alternative Provision Contracts with Schools.

For schools interested in availing the services of Bridge Training Ltd for Year 10 or 11 students, places can be contracted on a termly or annual basis. As with all students, the emphasis on education, welfare, and safeguarding is paramount, with ongoing communication between Bridge Training and its stakeholders being key to a safe and productive transition.

Attendance, welfare, and progress are communicated daily, weekly, or termly to ensure that both the student and the service recipient benefit from their time spent with us.

For more information on this service, please contact Marcus Ridler (Marketing and School Liaison Manager).
